

## SMART FUNCTIONS

The smart functions of the ETAPpro help you to minimize and optimize your energy consumption.

### Load balancing and load sharing

Charger adjusts charging current depending on household consumption and available remaining power. Load sharing distributes the available power across all chargers.

### Peak shaving / Capacity tariff

Adjust the charging current depending on the capacity tariff.

### Solar charging

Solar charging: 100% of the generated solar energy is used instead of delivering excess energy back to the grid.

### Scheduling & reporting

Program your charger in a way it only charges when power costs are low. Look up summary & details of charging sessions.

### Easy and flexible charger management

Have your charger managed by a Charge Point Operator (CPO) and have your split billing handled by them.

### EMS

The ETAPpro can communicate with energy management systems over ModBus or API.

**ETAP** PRO  
ALWAYS IN CHARGE

## About us

EVchargeking is a Belgian manufacturer of charging cables and now also producing smart chargers for electric cars. **COLRUYTGROUP** who recently transferred all its energy-related investments (including EVChargeking) to the Virya holding company, invested a substantial amount in 2021

EVChargeking has been providing quality solutions for charging electric vehicles since 2014, with a dedicated range for Tesla vehicles. They use high-quality electric cable from European origin for their products and produce almost everything locally in Belgium, allowing for maximum quality.

## Easy to use

No complicated installation or specialist tools. Just plug in the charger and start charging. Plug & charge!

## Safe

The ETAPpro is equipped with a wide variety of safety features making it the safest charger on the market.

## Best in class service

Experiencing problems with your charger? We will send a replacement charger within 24 hours. With our digital twin you'll have a seamless swap experience. This way all your existing app settings and history are preserved.

## Worry-free charging!

The smart charging functions allows you to charge your car safely at home and on the road, without losing track of your charging costs.

## Save money

Smart functions like solar charging, peak shaving save money and reduce CO<sub>2</sub>

## Quality

Weather resistant, capable of withstanding high loads and tested to meet the highest requirements. In short a Belgian top product with a long life span.

## Flexible

Charge anytime, anywhere and anyhow with the adapter cable that suits your needs. The charger comes with a standard 230V/10A cable, optionally you can choose a 16A single phase or 16A 3-phase cable.

## ETAPpro APP

The ETAPpro charger connects to your smartphone through the cloud. This gives you total control of your charger, anytime and anywhere.

The easy interface allows you to check the status of the charger, the charging session or to take advantage of the smart functions such as solar charging, peak shaving, load balancing or load sharing.

## Fixed or mobile

Slide the ETAPpro into the wallbracket for fixed use and charging at 11 kW. Pull it out the wall bracket and fit an adapter cable for mobile charging.
